EXPERIENCE

NOV 2016 – JUL 2017
WEB DEVELOPER, PAPYROFIX PVT. LTD.

I worked for a company called Papyrofix and helped them in developing their website's first and second version. I used HTML, CSS, Bootstrap, Php, and JQuery in the development of their website.
Reference: shounak@papyrofix.com

JUL 2017 – NOV 2017
WEB DEVELOPMENT ENGINEER, CHAYA EDUCATION PVT. LTD.

I worked for Chaya education Pvt. Ltd. (cracku.in) for 3 months working on various technologies such as Django (Python and Jinja2), WordPress (Php, HTML, and CSS), MaterializeCSS, Bootstrap, JavaScript, and JQuery.
Reference: maruti@cracku.in

DEC 2017 – JUN 2019
FRONT-END DEVELOPER, SORCERERS TECHNOLOGIES INDIA PVT. LTD.

I worked for Sorcerers Technologies as a front-end developer. I worked to clean up their UI, creating standards for future front-end development. I worked in a very small team consisting of two front-end developers. Being more experienced than the other developer, I worked on many of their core products. I worked on CodeIgniter, Angular1, Core Javascript, JQuery, HTML and CSS
Reference: saurabh.devera18@gmail.com

DEC 2017 – JUN 2019
SDE-1, PEOPLEPROSPER TECHNOLOGIES PVT. LTD.
I am currently working for PeopleProsper Technologies for last 1 year. I learned a lot on the studying form their large code base. I worked on Django, Python, React, Vue, ES6, SCSS and Postgress

EDUCATION

JUL 2012 - MAY 2015
B.TECH (CSE), SHIATS, ALLAHABAD
I was doing my Bachelors of Engineering form Sam Higginbottom Institute of Agriculture, Technology, and Sciences, but dropped out in 2015 due to family crisis.

SKILLS

- HTML
- CSS
- SCSS
- Bootstrap
- Materialize CSS
- Mongo Db
- Firebase
- Django

- JavaScript
- JQuery
- React Js
- Vue Js
- Node Js
- Express
- Git
- Dialogflow

PROJECTS

IPL Stats:

I am currently working on a project to display IPL (Indian Premier League) data in an intuitive way. The backend of the project is developed using Node JS, Express, MongoDB (Mondo Atlas) and the front end is developed using VueJS and MaterializeCSS. I have not yet hosted the project but the current progress can be found on my GitHub page.
Repository: https://github.com/a1ph4/ipl-app/

JD – Simple CSS Framework and JS Validation Library:

I developed a simple CSS Framework for 12 Columns page structure. I used LESS (CSS Preprocessor) for rapid development of the related styles. I also developed a JS Library for input validation in vanilla Javascript.

VocabGuru:

I developed a Chabot to help new English learners improve their vocabulary. I worked for a week developing the first version on this project. During the development of this project, I learned a lot about DialogFlow, Google Cloud Functions and Firebase hosting and storage. The project is hosted on firebase and can be accessed using the following link.
https://vocabguru-3ac8e.firebaseapp.com

Student Information Portal:

I headed a group of three in the development and presentation of Web Portal. We used HTML, CSS, Bootstrap, and JQuery in the development of this project and were highly appreciated for the work well done.

RFID Attendance System:

My final and certificate project during my summer training at Robosapiens Technologies Pvt. Ltd, Noida. I used Atmega-16 microchip with RFID module. I used Embedded C to program the logic of the system.

Public Relation Officer and Technical Advisor:

I was Public Relation Officer and Technical Advisor of my college Literary Club. I also worked as Chief Advertising Officer of the literary club during the preparation of and success of the official inauguration.
